(57) **ABSTRACT**

The present invention provides a new and distinct *cannabis* cultivar designated as ‘CAKE BATTER COOKIES’. Disclosed herein are main terpenes of ‘CAKE BATTER COOKIES’, which are limonene, beta-caryophyllene, beta-pinene, linalool, alpha-humulene, alpha-pinene, fenchol, myrcene, alpha-bisabolol, and alpha-terpineol. Also, the present invention provides the estimated concentration of the THC_{max} , CBD_{max} and CBG_{max} , about 6.5-14.21%, about 5.36-9.82%, and about 0.11-0.42%, respectively, at the time of assaying metabolites from flower samples of ‘CAKE BATTER COOKIES’.

8 Drawing Sheets

1

Latin name of genus and species: *Cannabis* hybrid.
Variety denomination: ‘CAKE BATTER COOKIES’.

BACKGROUND OF THE INVENTION

The present invention relates to a new and distinct *cannabis* cultivar designated as ‘CAKE BATTER COOKIES’.

This new cultivar is the result of controlled-crosses between proprietary cultivars made by the inventors. The new cultivar of ‘CAKE BATTER COOKIES’ was asexually reproduced via a stem ‘cutting’ and ‘cloning’ method by the inventors at Salinas, Calif. Asexual clones from the original

2

source have been tested in greenhouses, nurseries, and/or fields. The properties of each cultivar were found to be transmissible by such asexual reproduction. The cultivar is stable and reproduces true to type in successive generations of asexual reproduction.

TAXONOMY AND NOMENCLATURE

Cannabis, more commonly known as marijuana, is a genus of flowering plants that includes at least three species, *Cannabis sativa*, *Cannabis indica*, and *Cannabis ruderalis* as determined by plant phenotypes and secondary metabolite
